

Symbiosis 5 Rider

Symbiosis 5

-Guitar: electro-acoustic guitar and effect pedals with 6,3 jack output. We require: an amplifier, monitor speaker, power source, guitar stand, music stand.

-Saxophone: tenor, and sometimes soprano saxophones. We require, a microphone, monitor speaker, music stand and a separate microphone we can use to talk to the audience.

-Piano: the band gladly uses the electric or acoustic piano available at the venue. If it is possible, both an acoustic piano and a synthesiser would be needed for the concert. If necessary the band can provide their own (electric) instrument, a Yamaha DGX650. We also require a music stand and monitor speaker.

-Double bass: acoustic double bass with a pickup with 6,3 jack output, or a preamp pedal with xlr output. (The preferred way is using both the pickup of the bass and a microphone). Sometimes we also use a bass guitar which can be amplified the same way. We require: an amplifier (or we can go into the mixer with the preamp pedal), microphone, jack and xlr cables, monitor speaker, music stand and power source.

-Drums: the band gladly uses the drum set available at the venue. If needed, we can bring cymbals, a single pedal or a whole drum set. We require: drum seat, drum microphones, a monitor speaker, and a music stand.
